

Introductions for Using SAS Software

The SAS software, along with other computer software, is available for access via UConn AnyWare via the following link: <https://store.anyware.uconn.edu/vpn/index.html>

By clicking on the link above and using your net id to log in, you will be able to access the SAS software by clicking first on the AnyWare Desktop icon, and then on the lower bar at the search icon, by typing SAS and then selecting the SAS 9.4 Desktop app.

You can click on the yellow folder in the SAS 9.4 window. The above action opens up the SAS environment. In the lower window named “Editor – Untitled” you can import or write a SAS program.

You can copy the SAS programs posted on Husky CT with highlighting and then right click with you mouse and choose copy, or by clicking simultaneously the keys on your keyboard Ctrl + V. In the SAS window named “Editor – Untitled”, right click paste to import the SAS program file.

You can save this file and give it a name in your SAS folder that you have created in SAS environment, just under the 9.4 folder. If you decide to keep your SAS program files and output files in the PDrive folder, that has been recently migrate to UConn One Drive, then you will need to sync the AnyWare environment with onedrive via the one drive.com website, as described below.

To run the SAS software on a SAS file, you have to click on the “running person” icon, which is the 4th icon from the right on the upper bar. The SAS output will be generated in the upper window.

You can print the SAS file and SAS output file. You can also save these two files, using your favorite method, with or without editing, such as screen shots or print pdf.

For example, PDF995 is a free software that allows you to save these files as pdf, once you leave the AnyWare environment.

Another available method for saving pdf files of SAS program files and SAS output file in your SAS folder is: in the SAS program window and SAS output window, respectively, click on Print in the SAS AnyWare environment, then in the Select Printer window choose: Microsoft Print to PDF (from DT -) in session

In the bottom window you can give a name to your file. You can choose to save the file in a folder on your PC that you will be using for this course, or in the PDrive folder located on onedrive. via the following link :

Local Disk (C:) > Users > your net id > your folder (or PDrive folder) > dedicated folder for this course

Here are the steps to sync your files with AnyWare, so that you can access the PDrive in SAS environment:

1. Login to UConn AnyWare
2. click on the start button located in the bottom left corner
3. select and click on the Fire Fox browser.
4. in the search window type: onedrive.com
5. sign in with you e-mail id and password
6. click on the sync icon

That should do it. If you have problem with the sync procedure please call UConn ITS (860) 486 – 4457.

When you exit SAS and the AnyWare environment, you will be able to access the saved files in dedicated folder for this course on your PC.

To exit the AnyWare environment, you need to click on the start icon at the bottom left corner of your screen. Then click on power and then on disconnect. Then just exit the AnyWare environment.

If the sync procedure was successful you can access the PDrive folder on onedrive.
