Remarks: Starting with the Homework Assignment no 3, all data sets in the homework problems have to be analyzed using SAS software. Moreover, starting with the second homework assignment, always check the validity of the underlying assumptions for the model and use Tukey's multiple comparison procedure to compare the treatment means in fixed effects models, in addition to what is asked in the problems in the textbook. For random effects models, always estimate the variance components.

When submitting the homework to Husky CT, starting with Homework no 3, you need to include the SAS program file and an edited SAS output, based on which you have answered the questions. See additional instruction on the submission link of Husky CT cite.

Exam 1: Thursday, October 23. The material for the exam will include topics covered in class and the online Lecture Notes, on the material in Chapters 3 - 5. It is an open book and open notes exam. Scientific calculator is needed.

Academic, Scholarly, and Professional Integrity and Misconduct Policy

<https://policy.uconn.edu/2023/07/11/academic-scholarly-and-professional-integrity-and-misconduct-aspim-policy-on/>

A fundamental tenet of all educational institutions is academic honesty; academic work depends upon respect for and acknowledgement of the research and ideas of others. Misrepresenting someone else's work as one's own is a serious offense in any academic setting and it will not be condoned. Academic misconduct includes, but is not limited to, providing or receiving assistance in a manner not authorized by the instructor in the creation of work to be submitted for academic evaluation (e.g. papers, projects, and examinations); any attempt to influence improperly (e.g. bribery, threats) any member of the faculty, staff, or administration of the University in any matter pertaining to academics or research; presenting, as one's own ideas, or words of another for academic evaluation; doing unauthorized academic work for which another person will receive credit or be evaluated; and presenting the same or substantially the same papers or projects in two or more courses without the explicit permission of the instructors involved. A student who knowingly assists another student in committing an act of academic misconduct shall be equally accountable for the violation, and shall be subject to the sanctions and other remedies described in The Student Code.
